

WALK AROUND FEATURE POINTS

8210 AC WALKIE PALLET TRUCK

- 1 Click2Creep**
 - Toggle on and off with turtle button
 - Operates with tiller tucked securely to the tractor for tighter turning
 - Automatically reduces travel speed

- 2 Electric Brake Release**
 - Releases brake in low battery conditions
 - Easy access on console without removing cover
 - Retains ability to brake when the handle is in brake position

- 3 Increased Visibility**

Reflective logos and optional LED work light increase visibility in low light environments

- 4 AC Traction and Static Torque Control**
 - Provides smoother speed transitions
 - Separates speed from torque providing smooth, controlled operation – especially at slow speeds

- 5 Polycarbonate Snap-Fit Covers**
 - Snap-fit covers provide tool-less access for service
 - Heavy duty polycarbonate combines strength and flexibility for greater resilience and long lasting performance

- 6 Handle**
 - Heavy Duty Cast Aluminum Tiller
 - Programmable performance parameters
 - Features hall effect sensors and CanBus technology resulting in longer lasting components and up to 40% less wiring
 - Optional pin code pad helps prevent unauthorized usage

- 7 Ductile Iron Frame**

Supports the drive motor and transmission with almost twice the yield strength of low carbon steel for greater durability – especially over dock plates and lift gates

CONFIDENTIAL: Internal document intended only for use by authorized Raymond and Raymond Sales & Service Center Representatives.

- 8 Extreme Environment Options**
- Cold storage conditioning to -20 degrees
 - Hot dipped galvanization packages for food processing applications

IP65 Protection to Electronics – standard on all trucks

- Sealed contactors, connectors, controller, and cabling
- Electronics can take a pressure washing and perform reliably

- 9 High Strength Low Alloy (HSLA) Ribbed Bumper**
- High strength to low weight ration – same material used in automotive truck frames for strength and efficient operation
 - Ribbed design tests 3 times stronger than competitor's bumpers
 - Removes for easy service access

- 10 Superior Under Clearance**
- Cast components are securely tucked into fork frame for maximum clearance
 - Lift and Go technology trains operators to travel with forks elevated to prevent unnecessary wear

- 11 Undercarriage that Outperforms**
- Ductile iron bell crank and wheel forks are stronger and more resilient to stress
 - Stainless steel undercarriage pins help prevent rust and corrosion for longer component life and easier service
 - Composite Bushings never require greasing and last 4 - 5 times longer than steel bushings

- 12 Load Backrest**
- Provides easy access to battery pack for service
 - Features optional powered accessory bar
 - Retains ability to brake when the handle is in brake position

- 13 Power Options**
- Auto power off shuts the truck down to preserve battery capacity
 - Universal pack with HF Chargers can operate either wet cell or maintenance free batteries
 - Steel tabs secure batteries
 - Tool-less access to cover
 - Storage cleat secures charger cord
 - No need to unplug pack from truck to charge
